2. Plan, elevations and sections as applicable. See Below
3. Photos of site where improvement is proposed and photos of any precedents See Attached
4. Product Literature
5. Material samples
Good Afternoon, Bruce

Attached are photos of the Frame - which I have yet to paint and bolt it together; shaping the 2' long square post bottom section to fit our round sleeves with hand tools has taken longer than anticipated. I thought these detailed photos show the basic notched framing and ornamental post cap as represented in my application sketch, (I do not have the room in my garage bay to put the whole thing together out of the rain). Please contact me if you need more information.

Respectfully, Biff

Maybe I am missing something. This is a photo of the PVC frame. I thought you stated you would include a photo of the post you constructed. It doesn’t have to be painted if you didn’t finish it.

Respectfully, Biff
