**Permits are needed for Sewer Lateral Installations, on any private or public property.**

**Getting Started:**

1. Drain Layers Bond - $5,000 (Laterals, Sewer Mains); Bond paperwork Page 8.

2. Call Before you Dig Number 1-800-922-4455

3. Valid License – P1 or P7

4. Trench Box Tabulations Page 6 – if trench is deeper than 5’, depth will be verified prior to issuance of permit.

5. Certificate of Insurance showing worker’s compensation and “The Town of Farmington and WPCA listed as “additional insured.” Page 7

6. Fill out Sewer Permit Application online at [https://farmingtonct.viewpointcloud.com](https://farmingtonct.viewpointcloud.com)

7. **FEES:** You will be prompted to pay once all approvals are completed. Payment can be made online via Credit Card, by mailing in a Check, or can be made in person via Cash or Check. If paying by Check, please make payable to “Town of Farmington”.

    Sewer Permit Application - $50.00

The Town of Farmington requires a *minimum* 24-hour notice to schedule inspections prior to any work performed within the Town’s right-of-way, or connections to the sanitary sewer systems.

*Prior to the start of construction*, the contractor/developer must secure the necessary permits for doing such work, i.e., inland wetlands, zoning, building, road cut, sewer, site work, etc.

All contractors are required to be in compliance with all federal, state and local standards, including OSHA standards, Title 29 Code of Federal Regulations, including, but not limited to 1910.146, 1926.500, 1926.650, and 1926.652, regarding permit required confined space and excavations.

**IMPORTANT INSURANCE INFORMATION:**

1. The contractor shall provide a certificate of insurance showing the limits for general liability, auto, excess liability, and worker’s compensation.

2. The minimum limits are as follows:

   - General Liability: $1,000,000 or $2,000,000 Total Large Projects
   - Auto: $1,000,000
   - Excess Liability: $1,000,000 (Small Projects)
   - Worker’s Compensation: $500,000
NOTICE TO SEWER CONNECTION PERMIT APPLICANTS

1. The Engineering Division must be notified 24 hours before the connection is to be made so that inspection can be scheduled for Monday through Friday.

2. The Contractor may excavate the entire trench, locate the capped wye or stub and place 6” of ¾ inch crushed stone bedding before the inspector visits the site.

3. The cap must not be removed until the Inspector is present and in no case will the trench be drained of groundwater through the sanitary sewer lateral.

4. All laterals must be of 6” minimum diameter pipe from the main sanitary sewer to the house sewer.

5. Pipe joints shall be fixed gasket type.

6. All pipe shall be PVC SDR #35.

7. ¾” crushed stone bedding to be brought to top of pipe.

8. Place a layer of filter fabric.

9. Place one foot (1’) of clean coarse sand on filter fabric on which warning tape will be placed.

10. All other work shall conform to the “Town of Farmington Connecticut, Department of Public Works, Design Standards Manual, Issue Date July 2013”, including any revisions thereto to date.

11. If connection is made into an existing manhole, the manhole must be cored and a neoprene boot installed. The existing table is to be rebuilt. The coring and rebuilding of the table is to be inspected under the supervision of the Engineering Division Inspector (860) 675-2305.
IMPORTANT NOTICE TO EXCAVATION/SEWER CONTRACTORS

Prior to the issuance of a Road Cut Permit and/or Sewer Permit, which requires excavation, the contractor shall submit the following documentation to the Town Engineer.

1. Name of support systems such as trench boxes, sheeting bracing, shoring, etc., as required by OSHA regulations 1926.652 to support the sides of the excavation. Such sheeting, shoring and bracing shall be installed as required for protection of the work and for the safety of all personnel.

2. Name of person or persons knowledgeable of the confined space standards, Title 29 Code of Federal Regulations 1910.146, 1926.500, and 1926.650 promulgated by OSHA.

3. The name and qualifications of “competent person” who is capable of identifying existing and predictable hazards in the surroundings and working conditions, and who has authorization to take prompt corrective measures to eliminate them.

4. Documentation of the protective support system(s), which shall include design methods, limitations, and manufacturer’s tabulated data as outlined in OSHA regulations 1926.652. If a Registered Professional Engineer is required to design the protective support system, at least one copy of the design and certification shall be stored at the job site.

Upon acceptance of the above, the Engineering Division shall issue the excavation permit.

Shield capacity is in PSF per foot along the bottom of the Trench Shield

CONDITIONS FOR USE OF TABULATED DATA:

1. This Tabulated Data has been prepared by a registered professional engineer as required to comply with the OSHA standards CFR Part 1926, Subpart P.

2. The Soil types A and B are as defined in the OSHA standard. Soil Type C is defined as follows:
   Soil cohesive to saturated soil with an Equivalent Foot Pressure (EFP) or Equivalent Weight Effect of 60 PSF per foot of depth. This type of soil is a clay with an unconfined compressive strength of 5 tons/Sq. Ft., but greater than 25 Tons/SF, a saturated sand or clay, or fractured rock that is not stable.
   (Note: Soil conditions more severe can be identified with an EFP greater than 60 PSF/F. These conditions would be submerged soils, flowing mud, or muck. Such severe conditions would require the services of a soils engineer to determine the actual soil pressure. Consult GME when soil pressures exceed the tabulated values.)

3. Trench Shields shall be used in accordance with the depth/capacity charts. The maximum depth is the distance from the surface of the excavation to the bottom of the trench. Depth ratings shown are based upon examples of homogeneous soil conditions. Soil pressures may vary due to non-homogeneous soils, surcharge loads, and subsurface conditions. Actual soil pressures should be verified to be sure that the shield capacities are not exceeded.

4. Surcharge loads are not accounted for in the maximum depths. Surcharge loads are possible due to heavy equipment, vibrations, or spoil piles, adjacent to the trench. (Adjacent is defined as within a distance equal to the depth of the trench.)

5. Trench shields are not capable of providing stability to adjacent buildings or other structures. Refer to the OSHA standard for applicable requirements when trenching near buildings and other structures.

6. Long Term exposure is for trench shields used in one position greater than 24 hours. Short Term exposure is for shields used in one position for 24 hours or less. GME recommends that the chart for Long Term exposure be used to maximize protection. However, the chart for Short Term exposure may be used if the criteria for Short Term exposure can be met at all times.

GENERAL NOTES FOR TRENCH SHIELD USE:

1. Trench Shields are to be assembled and installed in accordance with manufacturer's instructions.

2. Any modifications to shields or use of component parts not manufactured by GME will void the tabulated data unless otherwise specified or allowed in writing by GME.

3. GME Trench Shields may be stacked, provided that appropriate connections are made between stacked shields as specified by GME. The stacked shields need only have a depth rating equal to or greater than the actual depth at which it is used.

4. Maximum depths are based on shields being in structurally sound condition. Trench shields should be inspected prior to each use for any damage or deterioration. If a shield has sustained major damage the tabulated data is void until repairs are made as specified by a registered professional engineer.

5. The use of GME Trench Shields shall be in accordance with this tabulated data and all requirements of the OSHA standard. Trench Shield usage other than specified or required may create unsafe conditions that could cause a cave-in, structural failure, or collapse resulting in a disabling injury or even death. GME shall not be liable for shield usage other than specified or required.
